Steel Grip

Gloves and Mittens

No. 605
\$10.20 per
doz. pairs
(or all lefts or
rights)

No. 674
\$10.20 per doz.
pairs

No. 680—Reversible Gauntlet Mitten.
Can be worn on either hand. Price,
\$10.80 per dozen pairs (24 mittens).

Give so much extra wear that they're the most economical gloves and mittens you can buy.

For sandblasters, shipbuilders, pig iron handlers, chain handlers, scrap handlers, smelters, miners, grinders, chippers, etc.

Steel-Grip Industrial Gloves and Mittens give this extra wear because of their patented Steel-Grip reinforcement of palm, fingers and thumb, and steel-sewed seams.

And this patented Steel-Grip reinforcing does not interfere with flexibility or comfort.

It **does** insure a longer life for gloves and mittens.

It **does** insure complete protection for the hands of workmen.

The steel sewing makes the gloves positively rip-proof.

These are the strong points of Steel-Grip Gloves and Mittens. See how well they work out in actual use to the advantage of yourself and your men.

A few users in Canada and Great Britain:

Box T-6, CHICAGO, ILLINOIS

Work Gloves

Are Tools

No. 644, \$15.00 per doz. pairs
(Or all lefts or rights)

A few users in the United States:

American Car & Foundry Co.
American Steel Foundries
Anaconda Copper Mining Co.
Bethlehem Steel Co.
E. W. Bliss Co.
Crane Company
General Electric Co.
International Harvester Co.
National Cash Register Co.
Staten Island Shipbuilding Co.
Vulcan Louisville Smelting Co.
Western Electric Co.
Willys-Overland Co.
U.S. Navy Yards

For the same reason that you furnish your men with time-saving tools, give them the best in hand protection.

Provide your workers with Steel-Grip Industrial Gloves and Mittens, because the patented Steel-Grip reinforcing and steel-sewed seams of these Work Gloves and Mittens are in themselves a guarantee of hand protection more lasting and more complete than that of any other glove or mitten.

Men equipped with Steel-Grips dig in with a will. Their total cost is paid for by the elimination of hesitation on the part of workers.

And the money they make by keeping men constantly on the job is **profit**.

On the basis of **wear** alone Steel-Grip Industrial Gloves and Mittens are the most economical you can buy.
